

**EnduroShield**

Request EnduroShield Rain Repellent for your windshield

- ◆ Dramatically improves vision in wet weather driving
- ◆ Repels rain, dirt, and oily road grime
- ◆ Allows easier removal of snow, ice and frost
- ◆ Improves optical clarity
- ◆ Reduces wiper smearing
- ◆ Allows easy removal of bugs
- ◆ Glass stays cleaner longer
- ◆ Protects against water marks
- ◆ Can help to improve efficiency of windshield wipers
- ◆ Effective on new and old windshields

Ultra long-lasting single application

\* 12 month warranty available from participating providers. See your provider for terms and conditions.

GLASS RAIN REPELLENT

### ULTRA LONG-LASTING APPLY ONCE REPEL UP TO 1 YEAR

As featured by UK's Auto Express Magazine, Spain's Motorpress Iberica Magazine and Driver Safety Australia

# Drive Safer

# Drive Confident

## How Does It Work?

EnduroShield® uses state-of-the-art nanotechnology to transform automotive glass into a high performance, ultra-long lasting rain repellent surface. This non-stick invisible shield turns rainwater into beads which are easily swept away by the wind, ensuring clearer vision in wet-weather driving.

In snow conditions, the repellent nature of the coating reduces the adhesion of snow and ice, allowing easier removal.

Repels snow and ice, allowing for easier removal

Improved visibility increases safety

## Repels Rain & Improves Visibility

The University of Michigan undertook a study to determine the effects of rain repellent coatings on automotive windshields. Under simulated rainy driving conditions, treated glass:

- ◆ Reduced Response Time: On average greater than 1 second: equivalent to more than 88 feet of travel at 62mph (27m at 100kmh)!
- ◆ Significantly Increased Visual Acuity
  - 34% higher ability to recognize objects, signs, and hazards
  - Night time vision as clear as untreated daytime vision

## Ultra Long-lasting

Unlike traditional coatings, which need to be regularly recoated in order to maintain their ability to repel water, EnduroShield is ultra long lasting on your windshield.

### WEATHER IMPACTS ON DRIVING

Over a 14 year period, data has shown that **11% of crash injuries were rain-related.**
