- Easy to clean
- Durability tested

Reduce housekeeping costs and room turnaround time

The average hotel room takes approximately 30 minutes to turnaround, depending on the length of stay and size of room. Shaving just 2 minutes off this average could result in savings of thousands in labor costs every month[^]. EnduroShield can drive real cost savings by significantly reducing the cleaning time for bathrooms and glass surfaces.

Protecting from staining and etching caused by exposure to hard water, soap scum, and grime, EnduroShield makes cleaning easier every time and significantly reduces operating costs.

The permanent*, ultra-thin, transparent coating is ideal for:

- Glass shower units
- Wall and floor tile and grout
- Stainless steel or chrome tapware and accessories
- Glass railings and pool fencing

"I've had EnduroShield applied to a major San Francisco hotel, after experiencing the significant benefits it provides on showers in other locations I have managed. It's a no brainer on glass showers."

- Terrance Kelso, Sir Francis Drake Hotel, California

Protect your investment - suitable for new builds & existing properties

One single application lasts more than 10 years* on new glass or 5+ years on pre-installed surfaces. The coating can provide a reduction in both the frequency and time spent cleaning. For new projects, many of the largest glass fabricators around the globe already partner with EnduroShield, making the coating easy to specify as a pre-treated order during construction. For existing operational locations, the coating can be applied by our certified applicators. With the maintenance cost savings generated, the coating pays for itself in a short period of time.

glass

tiles & grout

stainless steel & chrome

*EnduroShield is independently certified for performance and durability to simulate a lifetime of 10 years on interior and exterior use by one of the most prestigious, global testing agencies TÜV Rheinland, Germany.

Improve guest experience! EnduroShield is proven on hotel projects in 6 continents

EnduroShield is available in over 50 countries and is used by a variety of hotels based over 6 continents. No matter the location of your property EnduroShield has you covered.

Applying EnduroShield to your project derives significant benefits, including:

- Minimizing the cleaning time for each shower after guest check out so ongoing maintenance costs are measurably reduced
- A reduction in the need for harsh chemical cleaners, aiding environmental responsibility programs, and again saving in maintenance costs
- Coated surfaces will remain in premium condition for each new guest
- Exterior glass such as pool fencing and railings are easier to clean and remain cleaner for longer

With EnduroShield you can rely on fresh aesthetics for a positive guest experience over the average life of a bathroom fit out, and also easily keep exterior glass looking clean and clear. Developed with cutting edge nanotechnology, EnduroShield is applied by many of the world's leading glass companies and major property developers to make light work of cleaning. Incorporating EnduroShield on your property will reduce costs and keep your surfaces sparkling.
